The screenshot displays the Supabase SQL Editor interface. The top navigation bar includes the Supabase logo, the project name 'Poom2407's Org', and the database name 'DB_Week03'. The main editor area shows a successful execution of an SQL query. The query is an INSERT statement into the 'books' table, adding three new records with details like book ID, title, and author. The results section at the bottom indicates 'Success. No rows returned', which is a common outcome for INSERT queries in Supabase as they return the affected rows. The interface also features a sidebar with a list of tables and a search bar for queries.
